![eHealth TECHNOLOGIES logo]

The leading technology-based records retrieval solution for minimizing administrative burdens for administrators, clinicians and patients.

An advanced technology solution the top health systems, CROs, and HIEs trust.

eHealth Technologies collects, organizes, and delivers medical records, images and pathology for health systems, clinical research organizations and health information exchanges to quickly simplify the complexities of managing disparate records.

We believe medical data should have an easy button. That's why our advanced healthcare technology backed by our compassionate team of experts transforms fragmented patient data, and puts it into a readable, accurate, and clinically organized file that allows clinicians the ability to quickly search and find the medical information they need at precisely the time they need it.

With eHealth Technologies, clinicians have a comprehensive view into the past, allowing them to plan for future patient visits and have meaningful appointments that include explanations, treatments, and comprehensive care plans.
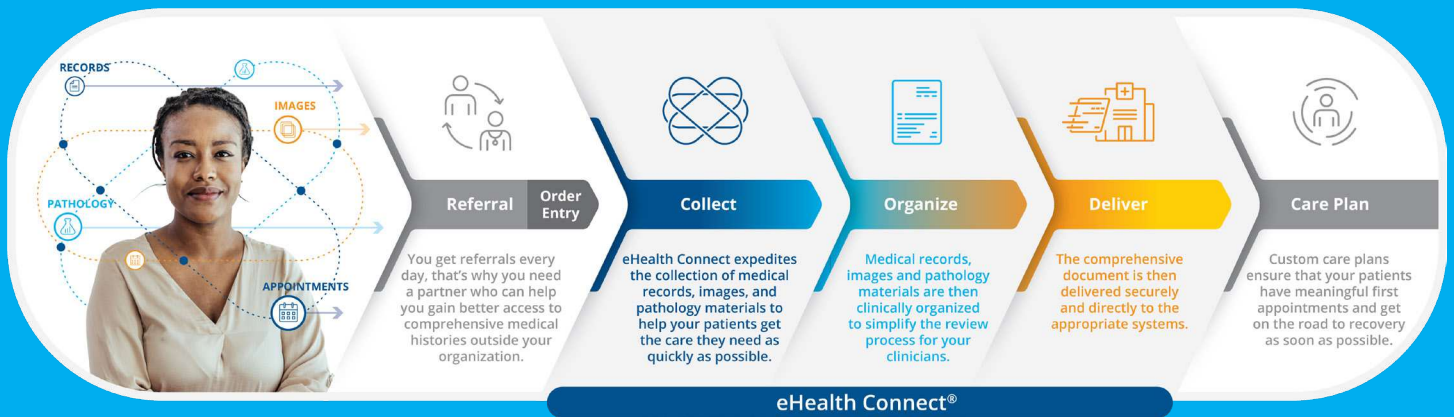

Our technology helps clinicians analyze patients' medical histories to help them uncover big-picture insights and make informed decisions to develop treatment plans that get patients on the road to recovery faster.

eHealth Technologies helps you:

- Enhance operational efficiencies.

- Reduce clinical hours spent on collecting and reviewing medical information.

- Provide more productive and meaningful patient visits with better care plans.

- Increase patient throughput by proving faster access to patient records.

Need a better way to manage the complexities of your patients' medical histories? **We can help.**

Empowering clinicians with the right information at the right time to improve patient outcomes.

Referral — **Order Entry**
You get referrals every day, that's why you need a partner who can help you gain better access to comprehensive medical histories outside your organization.

Collect
eHealth Connect expedites the collection of medical records, images, and pathology materials to help your patients get the care they need as quickly as possible.

Organize
Medical records, images and pathology materials are then clinically organized to simplify the review process for your clinicians.

Deliver
The comprehensive document is then delivered securely and directly to the appropriate systems.

Care Plan
Custom care plans ensure that your patients have meaningful first appointments and get on the road to recovery as soon as possible.

eHealth Connect®

What solution is right for you?

eHealth Connect® for Health Systems

Provides fast and seamless access to any patient's medical information through the collection of medical records, test results, and images. Our advanced technology solution takes fragmented information and clinically organizes it into one customizable file, so physicians have the information they need to provide custom care plans for superior care in a timely manner — in a fast, easy-to-use, digital format.

eHealth Connect® for Health Information Exchanges

Connects health information exchange users and physicians to image studies and results with our advanced technology, ensuring your clinicians can make clinically informed decisions with instant access to view patient images and collaborate.

eHealth Connect® for Clinical Research

Seamlessly brings together a potential clinical trial participant's vital medical records, images and pathology materials and clinically organizes them into an easy-to-access, customizable digital file. With our advanced clinical research technology, physicians have complete medical histories at their fingertips to make informed decisions and assessments quickly.
